Important information about this Business Occupational Tax Certificate

- ❖ Before relocation your business, please contact the Business License Office and get a change of address form. The Zoning Office needs to review your new location before you move.
- ❖ Your business is associated with you and your tax filing information. If you sell your business, the new owner needs to apply for his/her own business license. They cannot continue operating under your business license.
- ❖ All Alcohol Regulatory Licenses need to be reviewed and updated annually. Please notify the Business License Office of any changes to employees handling alcohol. This would include both new hires and changes due to promotion or replacement.
- ❖ If you plan to change your current business function or add additional lines of business to your operations, please contact the Business License office before adding to or changing your current business. These changes must be approved by the Zoning Office prior to commencement of operations.
- ❖ When you decide to close your business please notify the Business Licenses Office so that we can issue you a closing certificate and the necessary forms for the liquidation of your inventory. Once you have decided to close, there is a "90" day closing period from the day you start to close until you cease operations. Inventory must be taken and no additional inventory may be added.
- ❖ If you have questions please contact the Business Office.
